

BASS Electric was commissioned by the Stanford Marriot Court Hotel in downtown San Francisco to design a new lighting system for the façade of the property. BASS introduced an LED lighting system that is both rich in color and programmable for the changing seasons and holidays. The Stanford Marriott Court Hotel façade lighting project used cutting edge lighting and energy efficiency technology. The end result is maximum light quality, minimal energy demand and a testament to the Marriot's environmental stewardship.

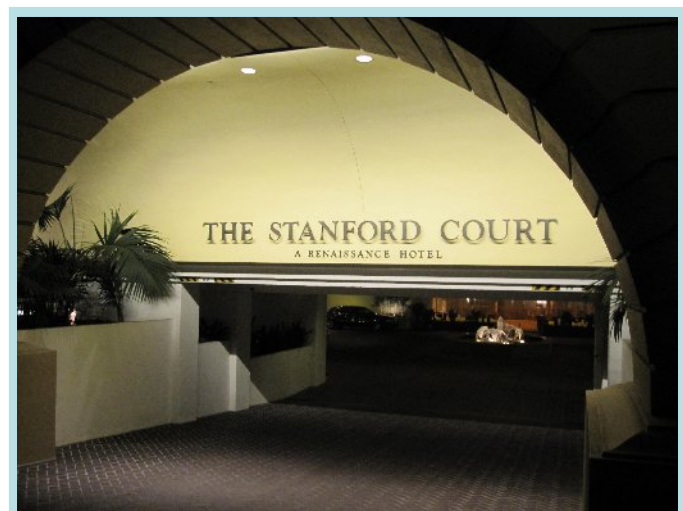

Project Highlights

- Color Changing and Programmable Lighting
- Specialized Trim and Column Lighting Design
- Improved Lighting Quality
- 10 Year Life, Reduced Maintenance

Financial Benefits

- Minimal Energy Demand, Max Light Quality
- 5.3 kW Annual Demand Offset
- Avoided 19,345 kWh
- City Rebates Subsidized the Project
- Environmental Leadership

BASS Electric provides turnkey energy solutions that will help clients balance the needs of their business with financial and environmental responsibility
